# Chapter 1 Overview

#### Topics:

- <u>Introduction</u>
- <u>Solution Template Overview</u>

This document introduces the deployment steps for HERE Maps & Location Services Data Streams Template on Azure Marketplace. The HERE Location Services Data Streams Template is a Solution Template on Azure Marketplace which deploys the HERE Maps & Location Services Data Streams into your resources along with a EventHub and CosmosDB.

### Introduction

HERE Maps and Location Services Data Streams Template brings enterprise-grade, SLA backed location services to Azure applications. HERE Maps and location services solve a range of problems from map visualization, navigation and routing, geocoding, time zone look ups to geofencing, custom locations and routing, route matching GPS traces, geospatial, sequencing multiple waypoints, truck routing, positioning, etc.

### Solution Template Overview

HERE Maps & Location Services Data Streams Template deploys HERE's enterprise class SLA backed Maps & Location Services, an EventHub and a CosmosDB for all your Azure Applications.

These services address a range of use cases like Fleet Utilization, Supply Chain Optimization, Urban Movement, etc., and open up new location intelligence opportunities in diverse industries like Automotive, Insurance, Internet and Media, Mobile Payments, Public Sector and Infrastructure, Telecom and Utilities, and Transportation and Logistics.

The function app in this ARM Template consists of the following HERE Location Service APIs:

Geocoding and Search

- Geocoder: Forward and Reverse
- Batch Geocoder
- Geocoder Autocomplete
- Places

Maps

- Map Image
- Map Tile

Navigation and Routing

• Routing - Mode (car, truck, public transit, bicycle) and algorithm (matrix, isoline routing)

HERE Maps & Location Services Data Streams Guide ► Overview

**Fleet Telematics** 

- Considering toll costs along a route
- Working with geofences
- Working with custom locations
- Building custom routes
- Integrating advanced HERE data sets
- Route matching GPS traces
- Calculating an optimal sequence of waypoints

More APIs

• Positioning - Provides positioning estimates based on global Wi-Fi and Cell coverage, which includes the latitude and longitude of the position with accuracy.

# **Chapter 2** Deployment Guide

#### Topics:

- <u>Acquiring HERE API Key</u>
- Deploying Solution Template on Azure Portal

### Acquiring HERE API Key

All users of HERE APIs must obtain authentication and authorization credentials and provide them as values for the parameter HERE API Key in the HERE Credentials section in Azure's template deployment page.

To obtain the credentials for the deployment of HERE Maps & Location Services Data Streams, please visit <u>https://developer.here.com</u> to register for FREE with HERE.

## Deploying Solution Template on Azure Portal

The below steps help you deploy HERE Maps & Locations Services Data Streams Template in your Azure resource group.

<u>Step 1</u>: Click on "Get it Now" button to start the deployment process.

<u>Step 5:</u> You now need to provide HERE credentials (HERE API Key) which are pre-requisite to access HERE resources. If you already have HERE credentials available with you, provide the same and click "OK". If you don't have HERE credentials, please visit

<u>https://developer.here.com</u> to register for FREE with HERE. You also need to select a Storage option, you can either select any existing Storage or continue with a newly created one.
