Chapter 1 Overview

Topics:

- <u>Introduction</u>
- Solution Template Overview

This document introduces the deployment steps for HERE Maps & Location Services WebApp Backend Template on Azure Marketplace. The HERE Location Services WebApp Backend Template is a Solution Template on Azure Marketplace which deploys the HERE Maps & Location Services WebApp Backend into your resources along with a ServiceBus and CosmosDB.

Introduction

HERE Maps and Location Services WebApp Backend bring enterprise-grade, SLA backed location services to Azure applications. HERE Maps and location services solve a range of problems from map visualization, navigation and routing, geocoding, time zone look ups to geofencing, custom locations and routing, route matching GPS traces, geospatial, sequencing multiple waypoints, truck routing, positioning, etc.

Solution Template Overview

HERE Maps & Location Services WebApp Backend Template deploys HERE's enterprise class SLA backed Maps & Location Services, a ServiceBus and a CosmosDB for all your Azure Applications.

These services address a range of use cases like Fleet Utilization, Supply Chain Optimization, Urban Movement, etc., and open up new location intelligence opportunities in diverse industries like Automotive, Insurance, Internet and Media, Mobile Payments, Public Sector and Infrastructure, Telecom and Utilities, and Transportation and Logistics.

The function app in this ARM Template consists of the following HERE Location Service APIs:

Geocoding and Search

- Geocoder: Forward and Reverse
- Batch Geocoder
- Geocoder Autocomplete
- Places

Maps

- Map Image
- Map Tile

Navigation and Routing

• Routing - Mode (car, truck, public transit, bicycle) and algorithm (matrix, isoline routing)

HERE Maps & Location Services WebApp Backend Deployment Guide

Fleet Telematics

- Considering toll costs along a route
- Working with geofences
- Working with custom locations
- Building custom routes
- Integrating advanced HERE data sets
- Route matching GPS traces
- Calculating an optimal sequence of waypoints

More APIs

• Positioning - Provides positioning estimates based on global Wi-Fi and Cell coverage, which includes the latitude and longitude of the position with accuracy.

Chapter 2 Deployment Guide

Topics:

- <u>Acquiring HERE API Key</u>
- Deploying Solution Template on Azure Portal

Acquiring HERE API Key

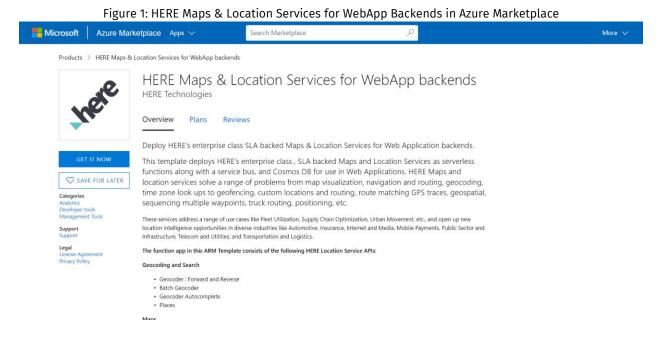

All users of HERE APIs must obtain authentication and authorization credentials and provide them as values for the parameter HERE API Key in the HERE Credentials section in Azure's template deployment page.

To obtain the credentials for the deployment of HERE Maps & Location Services WebApp Backend, please visit https://developer.here.com to register for FREE with HERE.

Deploying Solution Template on Azure Portal

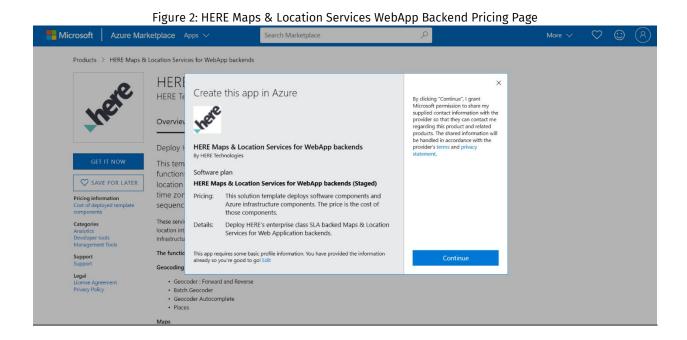

The below steps help you deploy HERE Maps & Locations Services WebApp Backend Template in your Azure resource group.

Step 1: Click on "Get it Now" button to start the deployment process.

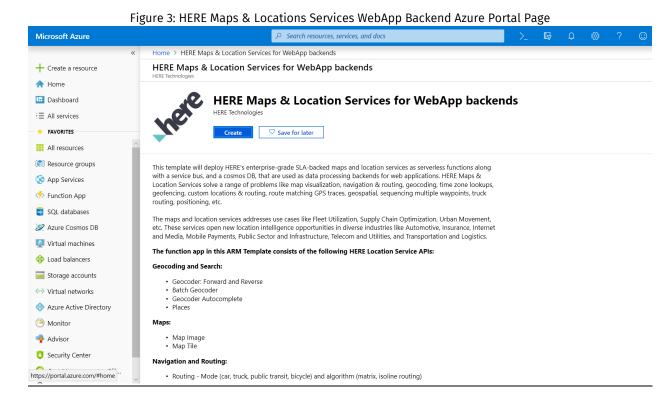

Step 2: Read through the Microsoft agreement and click on "Continue" when you are ready.

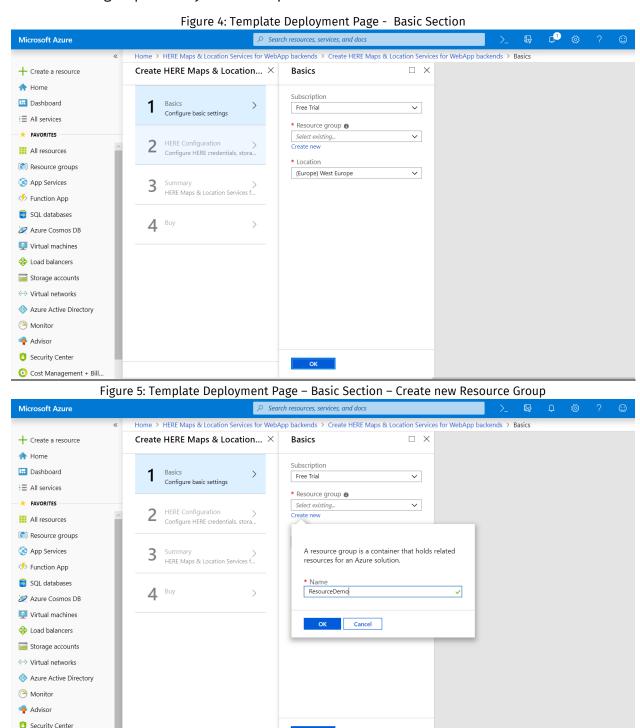

<u>Step 3:</u> You will be re-directed to template deployment home screen. Click on "Create" button to continue.

<u>Step 4:</u> You will now be prompted to provide details specific to deployment. In the "Basics" use any existing resource group you might have or click on "create new" button to create a new resource group. Select your Subscription details and location and click "OK" to continue.

OK

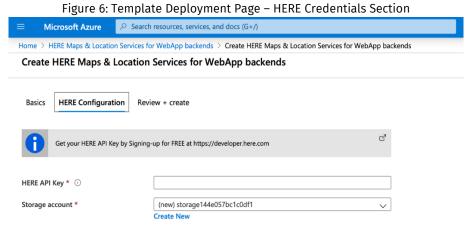

Ost Management + Bill..

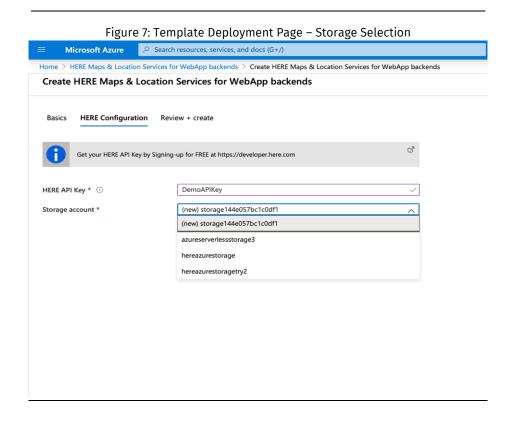

► Deployment Guide

<u>Step 5:</u> You now need to provide HERE credentials (HERE API Key) which are pre-requisite to access HERE resources. If you already have HERE credentials available with you, provide the same and click "OK". If you don't have HERE credentials, please visit

https://developer.here.com to register for FREE with HERE. You also need to select a Storage option, you can either select any existing Storage or continue with a newly created one.

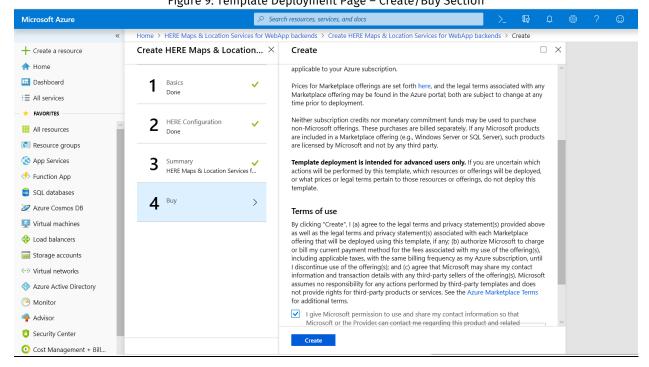

<u>Step 6:</u> You will see the summary of details, which were provided during the previous steps. Review the values and click "OK" once you are satisfied with all values.
